ROMANIA - COUNTRY , HISTORY , SYMBOL

- Romanians, as Latin people separated from the mother-tongue brothers by a "great glory" and seated at the crossroads of empires lavished by the earth, have hardly found a place on the political map of modernity.
- The union of the Principates at the mouths of the Danube, Wallachia and Tara Romaneasca in 1859, and then joining the provinces of Transylvania, Bessarabia and Bucovina in the wonderful year 1918, constituted historical achievements of our people, who built a proud state - Great Romania.
- Caught between the two tyrants, Stalin on the east and Hitler on the west, Romania followed the fate of Central and Eastern Europe: it gave away Bessarabia at the Soviet insistency and entered the block of communist states for 45 years.
- After 1989, Romanians chose the way of integration in the European Union and NATO and embraced the values of democracy, but Romanian people continue to live in two states: Romania and Bessarabia (officially called the Republic of Moldova).
